**AB-568 (Gonzalez Fletcher)** - School and community college employees: paid maternity leave. Requires that school districts, charter schools, and community colleges provide at least six weeks of full pay for pregnancy-related leaves of absence taken by certificated, academic, and classified employees.

**Veto Message:** This bill requires school districts, charter schools, and community colleges to provide at least six weeks of full pay for pregnancy related leaves of absence taken by certificated, academic and classified employees.

I have signed two previous bills, AB 2393 of 2016 and AB 375 of 2015, that allow these employees to receive differential pay for maternity and paternity leave. I believe further decisions regarding leave policies for school employees are best resolved through the collective bargaining process at the local level. I would also encourage districts to consider participating in the State Disability Insurance program that would allow these employees to receive pay in addition to what is already being provided.

**AB-1064 (Calderon)** - California State University: student discretionary expenses survey. Requires the California State University to conduct a survey every three years at each campus to determine the average student’s annual discretionary expenses, excluding tuition and fees, to attend the campus.

**Veto Message:** While I understand the desire to provide students and families with detailed and accurate cost information on all aspects of college attendance, the bill requires too many data points to be collected, analyzed and reported by each campus at not trivial expense.

If the Board of Trustees is dissatisfied with the way cost estimates are currently reported to the U.S. Department of Education’s College Navigator, then the Board should decide what information is most valuable and how much funding should be allocated to its collection and dissemination.

**SB-169 (Jackson, De León)** - Education: sex equity. This bill requires K-12 schools to use a “preponderance of evidence” standard to decide whether an incident of sexual harassment or violence occurred; requires higher education institutions to, among other things, adopt rules and procedures for the prevention of sexual harassment, and adopt and post on their websites the grievance and investigation procedures to resolve complaints of sexual harassment.

**Veto Message:** This bill would codify a combination of federal regulations and guidance on sexual harassment - some of which has been repealed, some of which is still in effect - as well as some language from model policies that have been developed by California universities.
This is not a simple issue. Sexual harassment and sexual violence are serious and complicated matters for colleges to resolve. On the one side are complainants who come forward to seek justice and protection; on the other side stand accused students, who, guilty or not, must be treated fairly and with the presumption of innocence until the facts speak otherwise. Then, as we know, there are victims who never come forward, and perpetrators who walk free. Justice does not come easily in this environment.

That is why in 2014 I signed into law the first affirmative consent standard in the country for colleges to adopt in their sexual assault policies, so that clear and basic parameters for responsible behavior could be established. Yes Means Yes, along with its attendant preponderance standard, is the law in California, which only the courts or a future legislature can change.

Since this law was enacted, however, thoughtful legal minds have increasingly questioned whether federal and state actions to prevent and redress sexual harassment and assault - well-intentioned as they are - have also unintentionally resulted in some colleges' failure to uphold due process for accused students. Depriving any student of higher education opportunities should not be done lightly, or out of fear of losing state or federal funding.

Given the strong state of our laws already, I am not prepared to codify additional requirements in reaction to a shifting federal landscape, when we haven't yet ascertained the full impact of what we recently enacted. We have no insight into how many formal investigations result in expulsion, what circumstances lead to expulsion, or whether there is disproportionate impact on race or ethnicity. We may need more statutory requirements than what this bill contemplates. We may need fewer. Or still yet, we may need simply to fine tune what we have.

It is time to pause and survey the land.

I strongly believe that additional reflection and investment of time in understanding what is happening on the ground will help us exercise due care in this complex arena. I intend to convene a group of knowledgeable persons who can help us chart the way forward.

**SB-318 (Portantino)** - California State University: personal services contracts.
This bill establishes standards for the use of personal services contracts by the California State University.

**Veto Message:** While I agree it is important for the California State University (CSU) to make prudent contracting decisions, CSU's union contracts already address the issue of outsourcing in the collective bargaining process.

As such, I don't see the need at this point to further rigidify this process.

I would, however, urge both the Trustees and the Chancellor's office to make every effort to ensure that CSU's contracts are well-justified, well-executed and perform as anticipated.
SB-478 (Portantino) - Public postsecondary education: transfer of community college students to the California State University or University of California.
This bill requires the governing board of each community college district to direct community colleges to identify and notify students who complete an associate degree for transfer, to automatically award these students with the degree and add the students to an identification system that is maintained by community colleges in a manner that is accessible to the California State University and the University of California for purposes of streamlining transfer.

**Veto Message:** This bill would require each community college to identify all students who have completed the requirements for an associate degree for transfer and automatically award that degree, but only in those years where the state budget appropriates specific funds for this purpose.

I support efforts to increase the number of transfer students to the California State University and the University of California, as well as to other four-year private universities, but funding a sporadic, manual "degree audit" is not the answer.

It would be better for community colleges to update their technology systems and processes in total, so that all students know how close they are to completing their degrees.

SB-574 (Lara) - University of California: contracts: bidding.
This bill modifies the requirements for qualifying as a lowest responsible bidder or best value awardee for contracts for materials, goods, and services at the University of California.

**Veto Message:** This bill seeks to equalize, or at least greatly minimize, the wage and benefit disparity between employees of the University of California (UC) and its contracted workers in specific job categories. This is the third time this policy, with some modification, has been passed by the Legislature.

After twice vetoing prior attempts, I am tempted to sign this measure, for no other reason than it is a well-intentioned bill that seeks to improve the financial security of contracted workers, or, alternatively, expand direct employment at the UC for lower wage workers. As the UC prides itself on being an agent of social mobility for students, it might follow that UC could similarly be an agent of social mobility for lower-wage workers at its campuses.

Good intentions, however, aren’t always enough. The mechanism to create this social change locks in cumbersome and overly costly contracting rules that provide little flexibility, regardless of circumstance. This will not serve the university or the state well.

In the best of worlds, the UC would make greater efforts to control its cost structure and find the means to better compensate lower wage workers, both employed and contracted—so that fewer would be concerned about housing, hunger and healthcare. Though UC has made some attempts in this regard, much work remains, including holding flat executive compensation and benefits that near many hundreds of thousands of dollars and more, far beyond what the average Californian would think reasonable for an employee of a public university.
What the state requires of the university's contracting policy should be more carefully considered, thoughtfully debated and weighed against other high value programs of expenditure. The State Auditor's recent report made some useful recommendations on contracting practices, which the UC can act on now. Other actions to improve UC's policies can be considered when the UC's total budget is considered by the state.

This bill would require, as a condition of receipt of state funding for the Graduation Initiative 2025, the Trustees of the California State University to approve, by August 1, 2018, a pilot program where a minimum of 10 campuses use multiple measures for the assessment and course placement of admitted students.
